PROFESSIONAL EXPERIENCE (7 years in programming)

06/2024 – Currently: Lead developer in Indra for the Ministry of Foreign Affairs

Development of a SPA in Angular to assist Spanish citizens abroad during crises (attacks, catastrophes, etc.). The application allows group management to organize transfers, repatriations, document renewals, safe-conduct passes, special assistance, etc.

The website has a caching system for areas without coverage and follows the design guidelines of the Ministry's official websites, and it has Accesibility AA.

Responsibilities:

- Participation in the development and layout of our own complete component library for the project and also for other official Ministry websites
- Multilingual support (ES, EN, CAT, EU, GL, AST, FR)
- Development of the application following a very strict style guide

Achievements:

- Some of my components developed for our project were so liked that they were adopted by several of the Ministry's official applications
- In a short time I established myself as the go-to CSS and layout developer within the team

See interactive demos in my portfolio ↗

11/2023 – 02/2024: Frontend programmer at Evora IT Solutions, (Munich), in an international team working in English. Development with Angular and NgRx to manage medical device maintenance. Analysis and complete migration of a large project from Angular 12 to 17. Conversion of the application to a PWA.

See more ↗

09/2021 – 07/2023: I was the main developer of a social network at In2art, where I was responsible for the frontend, design and part of the backend. Also, I am proud to say that I built the page from scratch using my experience in Angular, CSS, and TypeScript.

The first part of the project, when I did the structure and organization of the frontend, I developed it alone. As the web grew and new sections were added, I splitted the workload among DAM internship students (backend) that I trained myself in Angular, TypeScript, and CSS. Together, we worked as a team to create a true work of art.

I also created documentation with information and tutorials to compile the project, upload the web to the server, work with translations, and use files like .htaccess, among other things. I also developed various PowerShell scripts to automate compilations and translations.

See demos in video and more in my portfolio ↗

09/2020 – 06/2021: During my work experience at Matic Enginyeria Informàtica, I was responsible for programming both the frontend and the backend of a CRM system designed for customer, maintenance, and loading docks management for the company SystemBlock. I developed a web, an Android app and a UWP Windows 10 program.

In addition, I carried out maintenance and improvement of several webpages for Ocine, which included the creation of new sections, screens and functions, using CSS, Javascript, PHP and Joomla.

I also developed specific web pages for billboard screens in multiple cinema locations in Madrid.

Elaboration of documentation on how to generate signature keys for Android and UWP applications, and instructions for uploading changes to Ocine websites and synchronizing billboard monitors. Development of PowerShell scripts to automate tasks.

03/2020 – 11/2020: Developer of Android Apps and games for the Play Store.

09/2017 – 03/2019: Junior Programmer at Indra Soluciones Tecnologías de la Información, S.L.U, Girona. Interface programming for La Caixa employees and customers (Línia Oberta).

PERSONAL PROJECTS

- 4 Android apps
- First Person Shooter (made in Unity, final project of the App Development degree)
- Various websites and experiments on my GitHub
- Icon design
- Knowledge and experience in installing ROMs on Android devices
- Tasker (task automation app for Android)

ACADEMIC TRAINING

2014 – 2017: Double Higher Degree Training Course in Web and Multiplatform Application Development, Montilivi Institute (DAW and DAM).

ABILITIES

Angular, TypeScript, CSS, JavaScript, HTML, jQuery, Java, C#, PL/SQL, PHP, Python, Delphi, Pascal

LANGUAGES

Upper-intermediate English.

Native Spanish and Catalan.

OTHER EXPERIENCES

10/2016 – 03/2017: Intern programmer at Nexxia Soft.

02/2016 – 07/2016: Intern programmer at DSET Solutions.

OTHER INFORMATION

Driving license.

Ease to learn, analyze the situation, adapt to changes and work in a team.

Experience in training new workers.
